Fostering creative talent to lead the mobile industry
Mobile Systems Engineering

Smart Technology, Smart Education
The educational goal of the Department of Mobile Systems Engineering is to teach the most up-to-date mobile technologies including smart phones, smart pads, smart TVs, and other smart devices, along with mobile communication systems and networks providing various multimedia services. The department educates students so that they may develop various solutions for the multimedia mobile environment, and may learn practical knowledge of planning and marketing, with a globalized conceptualization of business.

Professional Expertise
For professional business skills, students experience practical teamwork-based problem solving processes, and the department runs a project-based curriculum with the support of industries and elective coursework.

Diversity and Creativity
The department gives students abundant opportunities for firsthand experience as interns at research agencies and institutions, while carrying out classroom education where they can strengthen their knowledge of technological changes. Faculties are from industries, universities, and research labs, and they are global experts with field experience to help the students nurture creative and flexible skills.

Aptitude
Mobile Systems Engineering has brought about changes in many sectors in society in areas of politics, economy, society, and medicine, thanks to new applications of IT on a global scale. Thus, students must have a professional attitude towards practical work, flexibility to communicate with different majors, creativeness to pioneer new areas, interpersonal skills to cooperate with other people and achieve goals, and globalized talent to interact with other experts on diverse fields and topics around the world. In short, the required skills and traits of students in this major are rigorous curiosity, enthusiasm towards learning, and persistence towards achieving goals.

Careers
Graduates may find work in the mobile communication field involving smart phones, smart pads, smart TVs and other smart devices. They can work in private companies, research institutions in the field of technology development, planning and marketing. Also, many experts are needed in mobile communication network system design and network building industries. Graduates can seek jobs in the fields of solutions, applications, and contents creation of smart mobiles, and they can get jobs at Korean and overseas organizations and institutions based on their foreign language skills and experience.

In today’s fast-moving global economy it takes more than street smarts and a strong will to be successful. Students in International Business Administration at Dankook University are given the knowledge they need to face the challenges of today’s business world. All courses are offered in English, and faculty represent a diverse range of backgrounds, giving students an edge in preparing for life on the global stage.

The International Business Administration Program and the College of International Studies at Dankook University also offer students a broad range of experiences, from learning Korean language and culture to participating in international events. Students get a taste of the real business world with guest lectures from the public and private sectors. Check out our website to see what kinds of events, site visits and special seminars IBA students have enjoyed recently.

There’s no better place to see the power of economic development and the importance of international trade than in Korea – a country that has earned global renown for its incredible economic growth. Students in IBA at Dankook can learn the secrets of Korea’s corporate powerhouses like Samsung, Hyundai and LG. For a deeper understanding of Korean life and culture, international students may take Korean language classes, taekwondo, Korean ceramic art, and other similar courses for credit during their studies, giving them a real taste of Korea. The university’s close proximity to Seoul allows for easy access to concerts, sporting events and countless venues to check out for the total Korea experience.

A Bachelor of Arts in International Business Administration at Dankook University’s College of International Studies is offered, and a broad range of courses covering management, marketing, organizational behavior, finance, operations, accounting, economics, international business and statistics provide a fundamental business education. IBA’s selection of diverse and internationally focused business electives such as International Marketing, Green Enterprise, International Finance, World Regions, International Tourism & Hospitality Management, International Trade Theory and Practice, etc., round out a complete global business education, allowing students to build a business degree geared toward their own professional goals. IBA graduates will be prepared to enter their professional area of choice or continue on to graduate studies.
The College of International Studies (CIS) at Dankook University was established in 2010 with the objective of advancing the university’s efforts to meet the challenges of globalization. At the CIS, students are fully immersed into an English-speaking academic environment and study under the direction of faculty and curriculum selected to provide global university education at international standards of excellence.

The central mission of the CIS is the education of multinational students through the extensive array of strong academic, professional and extracurricular programs that meet students’ personal and academic needs.

The college boasts a body of outstanding students and accepts applications from international students coming from various world regions, and various scholarship options are available, making the CIS an ideal choice for students from around the world seeking to experience college life in Korea and for Korean students pursuing globalized education.

Scholarships
Tuition scholarships of 50%, 75% or 100% will be offered to outstanding candidates based on TOEFL, SAT or ACT scores, or on other factors. Please contact the office for details.

Learning Environment
In the age of specialization, students need focused attention in their studies. Small classroom sizes and open access to professors and departmental support staff offer CIS students an ideal environment for learning.

Dormitories
International students generally stay at the dormitories, which offer all of the comforts students need. Dorms are reasonably priced and conveniently located on campus. Each room is completely furnished with 2 single beds, pillows, desks, chairs, wardrobes, telephone, internet connection and private bathroom. A variety of facilities are also available for residents’ convenience, such as a coin-operated laundry room, cafeteria, fitness center, supermarket, study rooms, etc.
