

Revitalizing Achievement by using Instrumentation in Science Education (RAISE)

RAISE Wants You!

RAISE Fellowships

Six \$30,000 graduate fellowships plus full tuition are available to qualified mechanical and civil engineering students under an NSF sponsored GK-12 Fellows program.

Fellowship Time Commitment: The position begins on June 1, 2006. Fellows must spend ten hours/week at a high school site and five hours/week in preparation. Fellows must also maintain a full load of graduate study and demonstrate progress toward their assigned thesis/dissertation research.

Responsibilities:

- . Serve on-site at a high school as a science resource to excite students about science and math by designing and conducting sensor-based experiments.
- . Develop and conduct technology workshops for high school teachers.
- . Collaborate with teachers to plan, develop, and conduct laboratory activities.
- . Conduct research in faculty directed projects in mechanical engineering (e.g., control engineering, mechatronics, smart sensors, etc.) and civil engineering.

Requirements:

- . B.S./M.S. in mechanical or civil engineering, or a related discipline.
- . Excellent scholastic record and a strong aptitude in math and science.
- . Familiarity with modern sensors, instrumentation, and MATLAB/LabVIEW.
- . Excellent written and oral communication skills.
- . Formal admission as a graduate student to Polytechnic University.

For full consideration submit: an application (available at <http://gk12.poly.edu>), curriculum vitae, statement of purpose, official transcript, GRE scores, and 3 letters of recommendation.
