NYU Tandon School of Engineering Presents The 14th Annual Undergraduate Summer Research Program

The NYU Tandon School of Engineering is pleased to announce the 14th Annual Undergraduate Summer Research Program. This program supports summer research internships with mentorship from Tandon faculty. These selected undergraduate students will have the opportunity to get involved in this cutting-edge research for 10 weeks, **June 1st - August 7th, 2020**. The positions consist of full-time work. In addition to their work in the lab, students will attend seminars put together by faculty, staff, and invited speakers as well as have the opportunity to present their own research to their peers.

The range of research projects in which students may participate in is quite diverse. Applicants are encouraged to find out about available research projects in their areas of interest from the attached list. For further information on a particular project or area of study, please contact the research mentors directly. The paid research assistantships are only available for those projects on the attached list.

Eligibility:

The Undergraduate Summer Research program is open to all NYU Tandon, NYU Abu Dhabi, NYU Shanghai, and NYU Dual Degree Program in Engineering (CAS/Tandon) students, and select non-NYU rising sophomores, juniors, and seniors who have a recommended minimum cumulative GPA of 3.0. All applicants must be current students and cannot have graduated with their BS degree prior to the start of the program. Incoming first-year students are not eligible for the program.

Please note that NYU CAS students who are not part of the Dual Degree Program in Engineering are NOT eligible to apply. In addition, students enrolled in other NYU Schools (with the exception of NYU Abu Dhabi and NYU Shanghai) are not eligible for this program.

Undergraduate students from other universities may apply for the program if they are U.S. citizens or permanent residents, and they meet the GPA and class standing requirements above.

As this is a full-time position, students **cannot** have another job or internship or take classes in addition to the required CP-UY 2340 UG Summer Research course unless preapproved by their research mentors. Moreover, please note that you cannot enroll in another summer course if it conflicts with the research schedule put forth by your faculty mentor as well as any of the meeting times for the CP-UY 2340 UGSRP course, which is required for all participants in the program.

Please note that some projects have special requirements for participation; please refer to the project listing for those project-specific requirements.

Application Process:

All applicants must apply using the online application portal located on the Tandon School of Engineering Undergraduate Summer Research Program webpage:

<https://engineering.nyu.edu/research/student-research/undergraduate-summer-research-program>

Completed applications are due on **Sunday, February 9th, 2020 at 11:59pm EST.** Neither late nor incomplete applications will be accepted.

Additional Information:

Please see the Summer Research Program FAQs for information regarding housing, stipends, fellowships, and further details about the program.
