

NYU CENTER FOR CYBERSECURITY

*With experts
predicting a
global shortfall
of almost
two million
cybersecurity
professionals
by 2022,
the CSS mission
is more vital
than ever.*

The **NYU Center for Cybersecurity** (CCS) is an interdisciplinary research institute dedicated to **training** the current and future generations of cybersecurity professionals and **shaping** the public dialogue about issues of **technology** and **security**. A collaboration between the NYU Tandon School of Engineering, NYU School of Law, and other NYU schools and departments, CCS focuses on cybersecurity from a wide range of perspectives — from **hardware**, **software**, and computer **networks** to human **behavior**, **legal** implications, and **policy** issues.

CSS INITIATIVES & MANDATES

Teaching

We promote a rigorous, interdisciplinary curriculum that prepares graduates to defend against increasingly sophisticated cyber threats on many fronts.

Research

Our researchers study cyber crime, cyber governance, cyber-physical systems, software security, digital forensics, privacy, and more in order to address pressing societal challenges and to develop novel technological solutions.

Events

CSS is at the forefront of public discussion on questions of technology and security, through initiatives like CSAW — the largest student-run cybersecurity event in the world — and the annual Women Leaders in Cybersecurity conference.

Student Scholarships

We offer a host of scholarships and programs to help open the vital field to a diverse group of the best and most committed students.
