1. Academic year to fall retention is defined as follows. Let X be he number of students enrolled at any point during a particular academic year and let Y be the number of those students who graduated. Then X-Y is the number of students eligible to continue the following fall. Instead of X-Y, only Z students continue. The retention is the fraction Z/(X-Y). The percent retention is 100 times this fraction.

 $^{2. \} The \ attrition \ calculation \ includes \ students \ tranfering to \ other \ schools \ of \ NYU.$
