Fall 2020 Humanities / Social Science (HU/SS) Electives at NYU Tandon

Courses that fulfill the hu/ss requirement are listed under these prefixes: AH, CAM, EN, HI, MD, PL, PS, SEG, STS, and URB. The minimum requirement for most majors is 24 units (6, 4-credit courses). Two of these are the first-year writing courses (EXPOS-UA 1 and 2, or EXPOS-UA 4 and 9). The rest are hu/ss electives. One elective must be writing intensive, and one must be at the 3000 or 4000 level (this may be the same course or two different courses).

Outside of NYU Tandon: Courses may be used to fulfill the hu/ss requirement if they are in a field of the humanities (such as art history, literature, history, philosophy) or social sciences (such as anthropology, psychology, media studies, or sociology). Courses outside of Tandon do not complement an engineering education in the same way as the courses do from TCS, but they can be used nonetheless. Note that the hu/ss requirement may not generally be fulfilled by a course that teaches a skill (such as introductory language courses, learning to play musical instruments, creating artwork, creative writing). A list of courses from other schools of NYU that are preapproved for the School of Engineering hu/ss requirement is available online on the Department of Technology, Culture and Society's webpage. If a course you want to take does not appear on the list, please contact Krysta Battersby (contact info is below).

TCS Minors: Each of the three majors in the department has a corresponding minor:

Integrated Digital Media	*Science & Technology Studies*	*Sustainable Urban Environments*
15 credits 3 credits in Audio or Visual Foundation Studio (DM 1113 or DM 1123) 12 credits of DM courses at the 1/2/3/4XXX level Note: DM courses are not hu/ss courses, but they may sometimes be taken as free or tech electives.	16 credits - STS 2004: Science, Technology, and Society or STS 3004: Seminar in STS - Three other courses from the list of STS electives. You will find STS electives in this shade below	16 credits from the core or concentration of the SUE major - At least two from these core courses: HI-UY 3034/W: History of NYC's Urban Infrastructure URB-UY 2024/W: Design of Cities URB-UY 2044: Methods URB-UY 2054/W: Intro to Urban Policy You will find SUE electives in this shade below

Cross-school Minors are also available in a wide variety of subjects, and when the courses for the minor are in the humanities or social science, they may be used to fulfill all or part of your graduation requirements at the School of Engineering. These minors are not administered by TCS; see the Registrar's website for more information.

Please note: A W following a course number indicates that the course is Writing Intensive. **All Tandon students must take at least one Writing Intensive course- this course must be completed at Tandon.** For the Fall 2020 semester, 25 Writing Intensive courses are being offered. Writing Intensive courses change every semester. A class that previously held the W designation may not this semester. Please do not compare Writing Intensive courses from previous semesters to this semester's list. This list is subject to updates/changes. Please visit the TCS office (LC 130- Dibner Building) if you have additional questions regarding humanities requirements. "Hybrid" courses are courses that are a combination of meeting in the classroom and online.
